

Construction

Commercial:

In the face of stiffer competition and tighter profit margins, modern business managers are taking a hard look at the bottom line.

They're demanding fast track construction of office and retail facilities that can live up to the highest standards of energy efficiency and maintenance ease.

Whether the space required is 2,000 or 100,000 sq. feet, Circle's familiarity with the latest, high-tech environmental control, data transmission and lighting options can save your client money every hour of every day. And that's the kind of customer satisfaction that means profitable referrals and repeat business for you.

Industrial:

From high voltage distribution systems to sophisticated process controls and productivity enhancing lighting, Circle can deliver a cost effective project designed for you. Our field force is supported by a staff of state registered engineers and designers employing a CAD System to quickly and accurately produce documents and drawings. The design efficiency continues to pay dividends in the field by allowing personnel to work smarter and faster through the construction process.

We also recognize that down time and power outages translate into lost production, and strive to minimize them when require. For your next project, call us and let us execute our technical approach, which will result in efficient and quality product.

Health Care & Institutional:

As the average American's life span increases, so does the need for ever more functional and versatile health care facilities.

Like medicine itself, this is a market segment requiring care and commitment of highly-trained specialists. In new construction and remodeling for hospitals, clinics, nursing homes and immediate care centers, Circle Electric offers a level of technical expertise you can feel good about. If you have a project under development now or one planned for the future, please don't hesitate to call us for a consultation.

Multi-Family:

While Circle Electric chooses not to pursue single-family residential projects, our expertise in multi-family and hotel/motel type projects enable us to provide complete services in all aspects of electrical and voice/data projects.

We offer a full range of service, from new construction of a motel or apartment projects, a factory renovation to an apartment complex or a 'townhouse complex' which was federally funded.

At Circle, state-of-the art technical skill, expertise and a "can do" attitude combine to successfully complete even the toughest challenge you can bring us.
