

Voice/Data

We are now your single source for data and voice systems.

Circle Electric system designers and installers are **BICSI*** certified, which means your system will meet industry specifications, codes and practices.

System Services:

- ❖ Voice and Data
- ❖ Fibre Optic
- ❖ Sound Systems
- ❖ VOIP Telephone Systems
- ❖ Fire Alarm
- ❖ Nurses Call/Intercom
- ❖

If required, we can support your systems with a UPS (uninterrupted power supply) or power conditioning equipment or incorporate it into a computer room design.

Whether it's consulting, installation or service, we have the expertise and experience to be your one-stop source for all your facilities needs in data, voice, power and lighting.

***Building Industry Consulting Services Internationals (BICSI)** a not-for-profit telecommunications association is a worldwide resource for technical publications, training, conferences and registration programs for low-voltage cabling distribution design and installation.
